EDUCATION

Master of Science, Major: Computer Science

Aug 2024 – May 2026

San Diego State University, GPA: 3.77/4.00

San Diego, USA

Relevant Coursework: Modern Web Development Framework, Algorithm Analysis & Design, Database Theory &

Implementation, Big Data Tools & Methods, Machine Learning, Computer Networks and Distributed Systems

Bachelor of Engineering, Major: Computer Engineering

Jun 2020 – May 2024

Gujarat Technological University, GPA: 3.91/4.00

Ahmedabad, India

Relevant Coursework: Web Programming, Software Engineering, Cloud Computing, AI, Data Structures

EXPERIENCE

Graduate Assistant | Python, Automation & Data Systems

Sep 2024 – May 2026

San Diego State University

San Diego, CA

- Designed and maintained automated data workflows processing 100M+ rows of multi-year financial datasets using Python, applying schema validation, batch processing, and error handling to ensure reliable, analysis-ready output.
- Improved data comparison efficiency by 40% by engineering fuzzy-matching automation to standardize entity names across 8M+ records spanning multiple financial databases.

Web Developer Intern | React, TypeScript, Chrome Extension (MV3), Playwright

Aug 2025 – Oct 2025

Reborn Tech LLC

Los Angeles, CA

- Implemented and tested a Chrome Extension (MV3) autofill system using React and TypeScript with fuzzy field-matching and ARIA-aware DOM scanning, improving job application completion rates by 35% across dynamic ATS platforms.
- Engineered multi-step form support for Work Experience and Education sections using add-entry flows and dropdown fuzzy matching, reducing form completion failures by 30% across complex, ATS platforms.
- Developed a config-driven Python and Playwright scraping pipeline to extract structured job postings across 5+ career portals, handling infinite scroll, virtualized lists, and deduplication for reliable downstream data delivery.

Software Developer Intern | .NET Core, RESTful APIs, SQL

Jan 2024 – Apr 2024

Mokshit Infotech

Surat, India

- Optimized backend request processing by 25% by building scalable .NET Core REST APIs supporting enrollment, scheduling, and curriculum management across 1,000+ sports organizations.
- Improved data reliability by designing normalized SQL Server schemas with structured indexing strategies, supporting transactional workflows across a multi-organization platform.

React.js Developer Intern | React.js, UI/UX, Agile

Jul 2023 – Aug 2023

Tatvasoft

Ahmedabad, India

- Built a responsive React.js web application with shopping cart, user authentication, and REST API integration for seamless frontend-backend communication.
- Delivered UI improvements and performance optimizations across sprint cycles, contributing production-ready components within an Agile development workflow.

PROJECTS

PackFoodReady2Go | ASP.NET Core MVC, C#, SQL Server, JavaScript, Bootstrap, Stripe [\[GitHub\]](#)

- Created a full-stack e-commerce platform supporting 250+ products, with 15+ modules including cart, checkout, order management, reviews, coupons, admin dashboard and user authentication flows.
- Designed responsive customer-facing UI features using JavaScript, HTML, CSS, and Bootstrap, including product filtering, sorting, search, image zoom, and side-by-side product comparison.
- Developed a normalized SQL Server schema with 17+ tables and applied the Repository Pattern with Entity Framework Core, supporting complete e-commerce workflows from product catalog to payment processing.

React Portfolio Website | React.js, Tailwind CSS, Framer Motion, GitHub Actions, Vercel [\[GitHub\]](#)

- Built a React portfolio website with component-based architecture, client-side routing, and smooth-scroll navigation, integrating reusable UI components across 7 sections for consistent, maintainable frontend structure.
- Automated the full release process by configuring a GitHub Actions CI/CD pipeline from scratch, enabling push-to-deploy updates to Vercel and eliminating manual deployment steps.

AirSlides | Python, OpenCV, Mediapipe, pytesseract, Text-to-Speech [\[GitHub\]](#)

- Implemented a real-time gesture recognition pipeline using Python, OpenCV, and Mediapipe to classify 6 gesture classes from live webcam input for touchless slide navigation, improving accuracy by 30% through feature extraction and preprocessing.
- Integrated pytesseract OCR and automated text-to-speech to convert 100+ slide text elements per session from unstructured image input into structured, accessible audio output.

TECHNICAL SKILLS

Web & Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Framer Motion, Chrome Extension(MV3), Webpack, DOM Manipulation, ARIA, Responsive Design, Chrome DevTools

Backend & APIs: C#, .NET Core, ASP.NET Core MVC, REST APIs, Python, Playwright, BeautifulSoup, OOP

Databases & Tools: SQL Server, Entity Framework Core, Git, GitHub, CI/CD(GitHub Actions), Postman, Jira, Vercel

Data & Scripting: Pandas, NumPy, Fuzzy Matching, Data Cleaning, OCR, JSON, Excel, Agile (Scrum)
